Massachusetts Institute of Technology

The Massachusetts Institute of Technology is one of the great universities of the world. Some of the famous MIT alumni include William R. Hewlett who co-founded Hewlett Packard; Kofi Annan, former Secretary-General of the United Nations and winner of the 2001 Nobel Peace Prize, Benjamin Netanyahu, prime minister of Israel; John M. Deutch, former Director of the CIA and the United States Deputy Secretary of Defense; and Robert Metcalfe who co-invented the Ethernet and *Metcalfe's Law*. Some famous professors at MIT include Noam Chomsky; Peter A Diamond, who won the Nobel Memorial Prize in Economics in 2010; and Jerome Lettvin, who was a cognitive scientist and professor Emeritus of Electrical and Bioengineering and Communication Physiology.

To everyone involved with making IACPES possible,

What a phenomenal experience. My extended visit to MIT was beyond anything I expected. I had the opportunity to meet great scientists and participate in a variety of seminars and meetings, in addition to making good progress with the research. I feel like the Dept. of Civil & Env. Engineering at MIT is a second home now. I am _extremely_ grateful for the opportunity. All the best, Jeff
